

hello!

The evolution of human creations has always fascinated me and my love for it has only increased. To be a part of the community that creates, ideates, and most importantly gives back to the world is what I am passionate about as a designer.

The world is filled with ideas and opportunities; I see it as my responsibility to give back to the world and create positive experiences doing the same.

## Experiences

2023  
industrial design freelance  
1. parametric lighting design  
2. CMF board

2023
